FABOGADOS

OUR LAW FIRM

Our partners have worked for more than ten years in two of the largest law firms in the Dominican Republic, which has allowed them to be in contact with the business scheme that these firms efficiently promote. That is how **FABOGADOS** was born, promoting personalized attention focused on case management with the client as its center.

Therefore, our solutions do not react to a systemic of pre-established scenarios. We believe that each situation must be deconstructed to its basic elements and, by achieving this, we can create catered solutions to better suit each case and client. We are committed to always maintaining a legal and creative coherence that allows us, no matter how big the problem appears to be, to identify solutions that are not necessarily apparent, but amazingly effective.

The law, although solid and invariable, maintains important margins of interpretation that allow a disruptive discourse aimed at promoting the evolution of our legal system and solutions.

In our office we combine strategic litigation in the different areas of local practice with the elements of corporate law and business, thus generating an interesting coalition of skills when evaluating the requirements, we receive. We understand that contributions to the legal community allow not only legal professionals to be nourished from different points of view, but, also, it is a great tool to promote the necessary changes in criteria in our country, because legislation is not always enough for real problems to be solved. For this reason, we take very seriously the study of specific problems and the subsequent production of opinions and articles that seek to promote technical and practical discussions. Thereby, you can find on our web dozens of publications made by our partners in different national and international media.

FABOGADOS

OUR AREAS OF PRACTICE

Our areas of practice are the consequence of the synergy created between our partners, associates, and advisers. We have a massive team led by Francisco Álvarez Martínez, who is considered to be the firm's strategic quarterback, not only for his vast experience within and outside the country, but for its ability to combine the efforts of the different areas of the firm, keeping an effective and proactive gear active, always looking the solution for the needs of each client.

Understanding that litigation does not necessarily end with rulings, and justice is very subjective, in FABOGADOS we are willing to generate legal situations and events in order to be closer to a real solution, and that is why our team handles different areas of law in an integral view, combining them for each case, thus being able to offer - from the same office - all the necessary solutions to satisfy those who require our services. Likewise, we use this knowledge and strategic litigation to provide preventive solutions that end up eliminating or considerably reducing the contingencies of our clients.
